Why Buy Matrix Anywhere Else?

The Matrix WorldWide Line

Original Matrix
Original Matrix was invented in 1959 and is still the most popular matrix in the world.

TRAX Matrix
TRAX Matrix is a pressboard matrix that is easy to use and work with, reduces damage to the board, and helps increase throughput.

XTC Matrix
XTC Matrix is a fully synthetic matrix with regular film base, which gives extreme durability, yet has a very competitive pricing structure.

Ameri-Ken carries a complete line of creasing supplies. Our matrix lines include the following:

Matrix WorldWide, a European product line invented in 1959 and still widely used today. Details of the three types of matrix are outlined to the left.

Ken-Score, a matrix line that is reinforced with a flexible steel base for optimum strength and wear resistance.

Pentra, a matrix system utilizing ultra thin pressboard so there's no need to calculate crease rule height.

We also carry creasing matrix tools and phenolic counter material.

Details on all our product lines can be found at ameriken.com or by calling one easy number **866-4-PUNCHES** to reach your local representative at one of our 5 convenient locations.

From matrix, to bench presses and miter pliers to counter material, Ameri-Ken has the most extensive line of creasing materials and tools in the industry.

With the largest inventory in the industry ready for same day shipping, our variety of creasing materials will meet the toughest demands for any application!

For all your creasing needs, the choice is obvious, and only one phone call away...
