

Why buy Flat Punches for your Rotary Process when you can buy

The Punch with a "Curve"

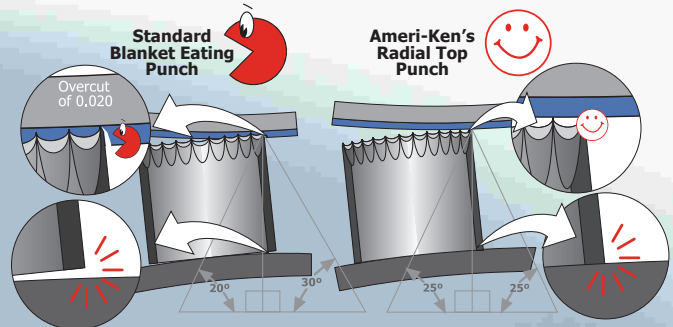

The Radial Top Rotary Punch

The Punch with a "CURVE"

Why settle for flat punches which are designed for flat diecutting when you can now get rotary punches designed exclusively for the rotary process?

Our unique curvature design works *with* your process, not *against* it. Radial Top Rotary punches (patent pending) eliminate "Wagon Tracks", reduce damage to the dieboard, require less cutting pressure, and are blanket friendly!
