

ProCrease

The new quality plastic creasing matrix

ProCrease is manufactured using state of the art, laser-controlled technology, utilizing materials that create a creasing matrix with excellent impact strength for longer life.

Engineered shoulders for faster, smoother substrate throughput. Shoulders perfectly bonded to ultra-thin plastic base.

Patented adhesive-free locator bonding leaves no sticky residue. And the new locator design rests within the channel for perfect alignment along the whole length.

Color coded, by channel height, both locator and matrix is printed with product dimensions.

Now with Finger-Lift!

The finger-lift tape liner allows quick removal, saving time and money.
